

Language Comparisons Continued...

In my previous article, I explored a range of functions and delved into how syntax varies across different programming languages.

If you haven't had a chance to check it out yet, I highly recommend giving it a read.

You can find the article right [here](#).

A Screen a Story - IBM i Startup Programme QSTRUPPGM?

Although it is possible not to use a Start-up program, finding a customer who does not use one, is like finding a needle in a haystack. Please allow me to use another expression which, when finishing reading this article makes sense for you "if it ain't broke don't fix it".....
